ABOUT THE SEMINAR

Modern Era envisages the vision that 'Education is not for the class, it is for the mass'. Here comes the concepts of 'Education for all', 'Universalisation of Education' etc. Inclusive Education invites all the members of the society under a common frame-work irrespective of the socio-economic-biological-cultural-racial-religious backgrounds. It admits every-one to receive age-specific education in an integrated manner.

Inclusive Education obviously is a challenge, specially for making a new generation, a new global periphery. Inclusive Education was the dream of Swami Vivekananda as he always welcomed the mass in the venture of education. Even today, The National Policies on Education put stress on the concept of 'Inclusive Education' to get the persons sensitized in the proper manner so that the true concept of Inclusive Education will be made into practice. On the other hand, the misinterpretation of the concept of 'Inclusive Education' may result evil effect.

The present seminar focusses on different educational strategies which will be applicable in different dimensions of disabilities in inclusive set up.
